COMPANY OVERVIEW

Thornevale Group is a practitioner-led data governance advisory firm. We put governance, stewardship and data quality controls in place so agencies and their prime contractors can trust their data, prove compliance and pass audits with confidence. We integrate five disciplines — Critical Data Element (CDE) Identification, Data Quality, Data Stewardship, Data Governance and AI Governance — under one accountable partner, and we work directly as a prime or as a subcontractor.

CORE COMPETENCIES

Data Governance & IT Talent Recruiting

Practitioner-vetted data governance, data quality and IT professionals for agencies, primes and companies.

Data Steward as a Service

Experienced data stewards on demand — monthly staff augmentation or subcontract support.

Critical Data Element (CDE) Identification

Identify, define and document the data elements your mission, reporting and regulators depend on most.

Data Quality as a Service

Data profiling, quality rules, scorecards, issue triage and root-cause remediation.

Data Governance Program Design

Operating model, policies, standards, roles, councils, metadata and business glossary.

AI Governance Program Design

AI use-case inventory, risk tiering, policy, controls and oversight before AI reaches production.

FEATURED OFFER: DATA TRUST QUICK-START

Know your critical data in 30 days. A fixed-price starter engagement: up to 25 Critical Data Elements identified and documented, a data quality scan (completeness, accuracy, consistency, timeliness), a stewardship gap review and an executive readout with a prioritized roadmap. **Priced within the federal micro-purchase threshold — government purchase cards accepted.**

WHO WE SERVE

- **Federal, state and local agencies** — directly, including micro-purchase and simplified acquisitions
- **Prime contractors** — as a small business subcontractor for data governance, data quality and staffing scopes
- **Commercial companies** — mid-size and growing organizations in financial services, healthcare, insurance and other data-intensive industries

DIFFERENTIATORS

- **Five disciplines, one partner** — CDE, quality, stewardship, governance and AI governance under a single operating model.
- **Senior practitioners only** — no bait-and-switch staffing, no junior-heavy teams.
- **Platform-fluent** — we work inside the tools you already own; no rip-and-replace.
- **Fast, fixed-price entry** — small, clearly scoped engagements that agencies can buy quickly.

PLATFORMS

Governance & Catalog: Microsoft Purview · Collibra · Alation · Atlan · Informatica IDMC · Databricks Unity Catalog

Data Platforms: Snowflake · Databricks · Microsoft Fabric · Amazon Redshift · Teradata

FOUNDER EXPERIENCE

Led by **Lucas Honore**, CEO & Founder — 10 years of hands-on data governance leadership. *Prior professional experience (not Thornevale contracts):*
